## **DETAILED ACTION**

### ***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
    - I. Claims 1-4, drawn to an ink for fabric printing, classified in class 106, subclass 31.13.
    - II. Claim 5, drawn to a printing method, classified in class 101, subclass 491.
  2. Claim 5 is being treated as an independent claim in short hand form.
  3. Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the ink for fabric printing as claimed in Invention I can be used in a different printing method than Invention II. Specifically, the ink can be used in a printing method that does not require fixing or heating.
  4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
  5. A telephone call was made to Joel Armstrong on November 8, 2004 to request an oral election to the above restriction requirement, but did not result in an election being made.
- Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
